# pimple

Description
Category Warmups
"This challenge is simple, it's just a pimple!"

We get a file called pimple to download. So let us check what type it is.

```
$ file pimple
pimple: GIMP XCF image data, version 011, 1024 x 1024, RGB Color
```

OK we know it is a GIMP file so lets check it out.

I did actually check the nose for a pimple, but what actually popped out was the list of pasted layers to the right of the image.

I checked each in turn and then found the flag.
