# tsunami

Description
Category Warmups
"Woah! It's a natural disaster! But something doesn't seem so natural about this big wave..."

We get a file called tsunami to download. Let's investigate the file type.
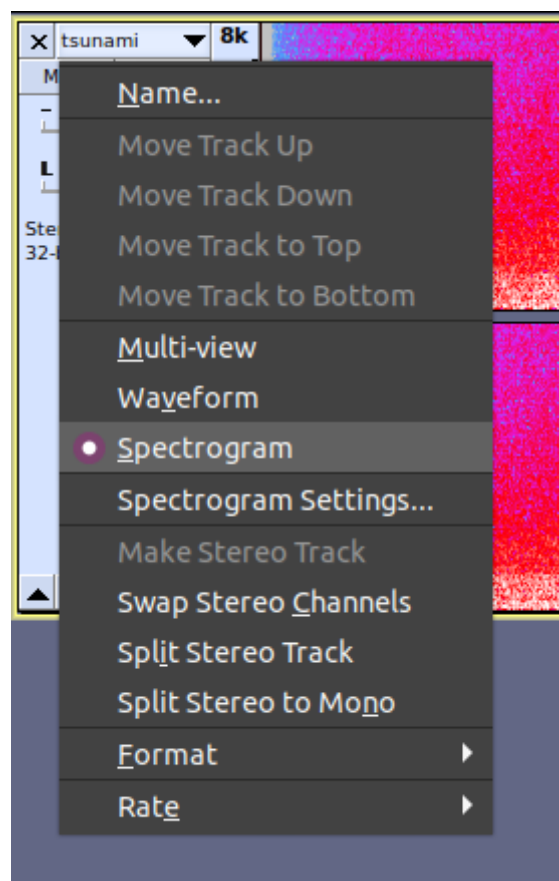

```
$ file tsunami
tsunami: RIFF (little-endian) data, WAVE audio, Microsoft PCM, 16 bit, stereo 44100 Hz
```
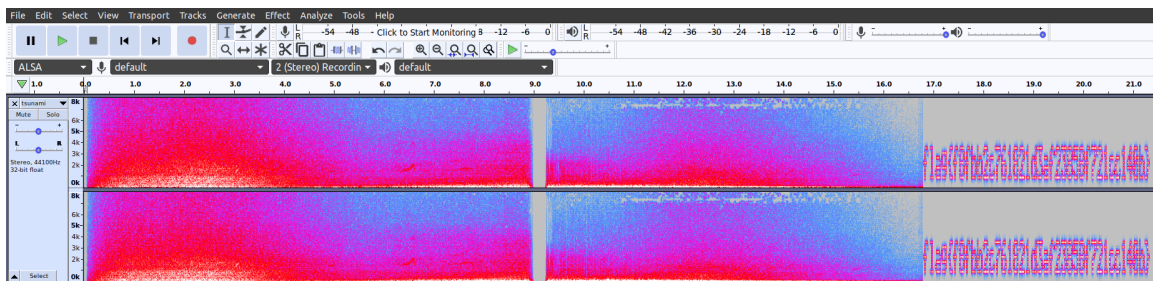

So a musical file. With a hint in the description giving away waves, lets look at it with Audacity.

To investigate fully this track we can use the Spectogram setting.

Now we have a more interesting view.

All we have to do now is manipulate the view by zooming in and we can see the flag.

Flag:
flag{f8fbb2c761821d3af23858f721cc140b}
